Niccolo Ortega

Full-Stack Developer

About Me

I'm a Full-Stack Developer from Los Angeles with a knack for problem solving! I'm curious, and I enjoy work that challenges me to learn something new and allows me to stretch in a different direction. I have working knowledge of HTML5, CSS3 and Javascript but still strive to learn new skills so that I can further my abilities.
Authorized to work in the US for any employer

Experience

2017 - Present

Art With Larisse
Front-End Developer

Freelance work for Art With Larrise. Brought clients wireframe to life using Node and React.
Stack: Node, React, Redux

Full-Stack Development Curriculum.
Academic Projects
Jul 2016-Aug 2017

Who's Hungry?

Who's Hungry is a food app designed to promote healthy eating. For those who are tired of eating the same bland food, it's time to spice things up and concoct delicious yet healthy meals. Powered by Yummly.

Stack: JQuery, Express, Unirest, Node, Nodemon
Repo: https://github.com/nfcortega89/yummly
Url: https://limitless-mountain-11507.herokuapp.com/

TRENDR.

Trendr is a gallery page that showcases trending images from carefully curated photos. Images are organized into categories where viewers can vote on them. The photo with the most up votes is displayed on the home page, and automatically changes based on the trending pictures.

Stack: React, Express , Node, Mongodb, Mongoose, Firebase Auth, Nodemon
Repo: https://github.com/nfcortega89/trendr
https://github.com/nfcortega89/trendr-client
Url: https://trendr-3eddc.firebaseapp.com

AirTime

Airtime is a powerful app made to help the user check weather conditions to make flying drones easier. With Airtime the user is given a variety of legal fly-zones in San Diego along with the current weather conditions, wind speed, and humidity.

Stack: React, Nodemon, Node
Repo: https://github.com/nfcortega89/airtime
